PROFESSIONAL SUMMARY

Aspiring **Full Stack Developer** with hands-on experience in **Java, React.js, HTML5, CSS3, Bootstrap, JavaScript, jQuery**, and **MySQL**. Completed three industry internships and developed projects across web application and AI domains from front-end to back-end, including a multimodal deepfake detection system, a location-based reminder web application, and a Voice-to-Text & Text-to-Voice communication system. Presented a conference-published research paper on multimodal deepfake detection. Eager to leverage technical skills and problem-solving abilities to contribute to software development teams as an entry-level Software Engineer.

SKILLS

- **Back-end:** Java, JDBC, JSON, Spring Boot, RESTful API, Postman, Maven
- **Front-End:** HTML 5, CSS 3, Bootstrap, React.js, jQuery, JavaScript
- **Databases:** MySQL, SQL Queries, SQL Joins / Database Optimization
- **Core Concepts:** OOPs, DSA, DevOps, Problem Solving
- **Tools:** Git, GitHub, VS Code, Eclipse
- **Soft Skills:** Logical Thinking, Teamwork, Communication, Adaptability

EXPERIENCE

WEB-APPLICATION Development Intern – RKS Infotech (Sep 2025 – Nov 2025)

- Developed responsive web applications using React.js, HTML, CSS, Bootstrap, JavaScript, and Java, improving page responsiveness by 20%.
- Built and maintained front-end interfaces and Java-based back-end features, integrating MySQL databases through JDBC and reducing data processing time by 15%.
- Collaborated on the development and maintenance of a real-time web application.
- **Tech Used:** Java, React.js, HTML, CSS, Bootstrap, JavaScript, JDBC, MySQL

AI & ML Project Intern – NexGen Technology (Jul 2024 – Aug 2024)

- Developed the Electronic Theft Detection system using CNN-based Deep Learning models.
- Performed dataset preparation, preprocessing, data cleaning, and feature refinement to improve model accuracy.
- Assisted in model training and evaluation using image datasets.
- **Tech Used:** Python, Deep Learning (CNN), Dataset Handling

Front-End Intern – VALVENET TECHNOLOGY (Mar 2024 – Apr 2024)

- Developed responsive web pages using HTML, CSS, React.js, and JavaScript.
- Designed clean, user-friendly interfaces and improved UI consistency across multiple web pages.
- **Tech Used:** HTML, CSS, JavaScript, React.js

EDUCATION

B.Tech – Computer Science and Engineering (2022–2026)

Rajiv Gandhi College of Engineering and Technology

CGPA: 7.8

Higher Secondary – HSC (2021–2022)

Seventh Day Adventist Hr. Sec. School

Percentage: 75%

PROJECTS

Hybrid Convolutional Model for Multimodal Deepfake Detection

- Developed a multimodal deepfake detection system by integrating image, audio, and video analysis.
- Implemented **VGG19, BiLSTM, and CNN-RNN models** for feature extraction and deepfake classification.
- Improved detection accuracy through multimodal feature fusion, data preprocessing, and comprehensive dataset evaluation.

Tech Stack: Python, VGG19, BiLSTM, CNN-RNN, GANs, NumPy, Jupyter Notebook, Deep Learning

Remember — Location-Based Reminder Web App

- Developed a **full-stack location-based reminder** web application that triggers real-time alarm and vibration alerts when users enter a predefined destination radius.
- Built the front end using React.js with Axios for API communication and developed RESTful APIs using Spring Boot and Maven for reminder management.
- Integrated OpenStreetMap (Nominatim API), OSRM API, and Browser Geolocation APIs to provide real-time location tracking, route calculation, and notification services.

Tech Stack: Java, Spring Boot, Maven, REST APIs, React.js, Axios, HTML5, CSS3, Bootstrap, Nominatim API, OSRM API, Geolocation API

Voice-to-Text & Text-to-Voice System (SIH 2024)

- Developed an Android application enabling real-time speech-to-text and text-to-speech communication.
- Integrated **Google Speech Recognition and Text-to-Speech APIs** for seamless user interaction.
- Implemented backend data management using Python and MySQL.

Tech Stack: XML, Android Studio, Python, MySQL, Google APIs

AI-Powered FAQ Chatbot

- Developed an **NLP-based chatbot to deliver context-aware** responses to user queries.
- Implemented intent recognition and automated response retrieval using a knowledge base.
- Built a web-based conversational interface for efficient user support.

Tech Stack: Python, NLP, Machine Learning, Flask, HTML, CSS, JavaScript

Real-Time Object Detection System

- Developed a real-time object detection system for object localization and classification from live camera feeds.
- Implemented **YOLO-based deep learning models with OpenCV for accurate** object recognition.
- Improved detection performance through image preprocessing and inference optimization.

Tech Stack: Python, OpenCV, YOLO, TensorFlow, NumPy, Computer Vision

AI Language Translator Web Application

- Developed a multilingual web application for **real-time text translation** and speech-enabled interaction.
- Integrated Translation APIs and the Web Speech API for language translation, speech recognition, and text-to-speech functionality.
- Designed a responsive user interface and optimized API performance for faster translation.

Tech Stack: JavaScript, Translation APIs, Web Speech API, RESTful APIs, HTML5, CSS3

ACHIEVEMENTS & CERTIFICATIONS

- **ICA6NT 2026** – Presented research paper on Multimodal Deepfake Detection, Chennai.
- **SIH 2024** – Built Voice-to-Text & Text-to-Voice Android app for deaf/mute users (Google TTS API, MySQL).
- **IBM MySQL Certification** – CRUD, database design & query optimization.
- **Java Web Dev** – EduSphere Solutions – Core Java & web fundamentals. Grade: A+.

AREA OF INTEREST

- Artificial Intelligence
- MERN STACK Development
- WEB-APPLICATION Development
