PROFESSIONAL SUMMARY

Aspiring **Full Stack Developer** with hands-on experience in **Java, React.js, HTML, CSS, Bootstrap, JavaScript, jQuery**, and **MySQL**. Completed three industry internships and developed projects across web application and AI domains from front-end to back-end, including a multimodal deepfake detection system, a location-based reminder web application, and a Voice-to-Text & Text-to-Voice communication system. Presented a conference-published research paper on multimodal deepfake detection. Eager to leverage technical skills and problem-solving abilities to contribute to software development teams as an entry-level Software Engineer.

SKILLS

- **Back-end:** Java, JavaScript, JDBC, JSON, Spring Boot, REST API, Postman
- **Front-End:** HTML 5, CSS 3, Bootstrap, React.js, jQuery
- **Databases:** MySQL, SQL Queries, SQL Joins / Database Optimization
- **Core Concepts:** OOPs, DSA, DevOps, Problem Solving
- **Tools:** Git, GitHub, VS Code, Eclipse
- **Soft Skills:** Logical Thinking, Teamwork, Communication, Adaptability

EXPERIENCE

WEB-APPLICATION Development Intern – RKS Infotech (Sep 2025 – Nov 2025)

- Developed responsive UI using HTML, CSS, Bootstrap, React.js, and JavaScript, improving page responsiveness by 20%
- Built a **real-time website involving both front-end and back-end development**
- Implemented website maintenance and back-end improvements using Java
- Built Java-based backend features and connected them to the database using JDBC, reducing data processing time by 15%.
- **Tech Used:** React.js, Java, JDBC, MySQL,

AI & ML Project Intern – NexGen Technology (Jul 2024 -Aug 2024)

- Built the **“Electronic Theft Detection”** system using Deep Learning models
- Developed model training, dataset preparation, and basic preprocessing tasks
- Improved model accuracy through data cleaning and feature refinement.ent
- **Tech Used:** Python, Deep Learning (CNN), Dataset Handling

Front-End Intern – VALVENET TECHNOLOGY (Mar 2024 – Apr 2024)

- Built functional web pages using HTML, CSS, React.js, and JavaScript
- Created clean UI layouts and improved design consistency across pages
- **Tech Used:** HTML, CSS, JavaScript, React.js

EDUCATION

B.Tech – Computer Science and Engineering (2022–2026)

Rajiv Gandhi College of Engineering and Technology

CGPA: 7.8

Higher Secondary – HSC (2022)

Seventh Day Adventist Hr. Sec. School

Percentage: 75%

PROJECTS

Hybrid Convolutional Model for Multimodal Deepfake Detection

- Developed a multimodal deepfake detection system **integrating image, audio, and video analysis**.
- Combined VGG19, BiLSTM, and CNN-RNN architectures for feature extraction and deepfake classification.
- Improved detection accuracy through multimodal feature fusion and comprehensive dataset evaluation.
- Achieved **improved detection accuracy** through feature fusion across modalities and rigorous dataset evaluation.

Tech Stack: Python, VGG19, BiLSTM, CNN-RNN, GANs, NumPy, Jupyter Notebook, Deep Learning

Remember — Location-Based Reminder Web App

- Architected a GPS-powered reminder app that **triggers real-time alarm + vibration alerts when users enter a defined radius around a destination**.
- Integrated **Leaflet + Nominatim API for map rendering & geocoding**, and **OSRM API for live route** drawing and distance calculation.
- Utilized native Browser APIs (Geolocation, Vibration, Audio) for a fully client-side, zero-backend experience.

Tech Stack: React.js, Vite, Leaflet, React-Leaflet, OpenStreetMap (Nominatim API), OSRM API, Geolocation

Voice-to-Text & Text-to-Voice System (SIH 2024)

- Built an Android application enabling **real-time speech-to-text and text-to-speech communication**.
- Integrated Google Speech Recognition and Text-to-Speech APIs for seamless interaction.
- Developed using Android Studio with backend support from Python and MySQL.

Tech Stack: Java, XML, Android Studio, Python, MySQL, Google APIs

AI-Powered FAQ Chatbot

- Developed an **NLP-based chatbot to answer user queries** with context-aware responses.
- Implemented intent recognition and automated response retrieval for efficient user support.
- Built a web-based conversational interface integrated with a knowledge base.

Tech Stack: Python, NLP, Machine Learning, Flask, HTML, CSS, JavaScript

Real-Time Object Detection System

- Developed a real-time object detection system for **object localization and classification from live camera feeds**.
- Implemented YOLO-based deep learning models for accurate and efficient object recognition.
- Optimized detection performance through image preprocessing and inference enhancements.

Tech Stack: Python, OpenCV, YOLO, TensorFlow, NumPy, Computer Vision

AI Language Translator Web Application

- Developed a multilingual web application for **real-time text translation and speech-enabled interaction**.
- Integrated Translation APIs and Web Speech API for language conversion, speech recognition, and text-to-speech functionality.
- Built a responsive and user-friendly interface with optimized API performance.

Tech Stack: JavaScript, Translation APIs, Web Speech API, RESTful APIs, HTML5, CSS3

ACHIEVEMENTS & CERTIFICATIONS

- **Conference Presenter (ICA6NT 2026)** – Presented a research paper on “Multimodal Deepfake Detection” at an international AI conference organized by Velammal Institute of Technology, Chennai.
- **Java Web Development Certification (EduSphere Solutions)** – Completed a 4-credit Java Web Development program with an A+ grade.
- **Smart India Hackathon 2024** – Developed a Voice-to-Text & Text-to-Voice Android application for accessibility.
- **IBM MySQL Certification** – Completed training in MySQL, CRUD operations, database design, and query development.

AREA OF INTEREST

- Artificial Intelligence
- MERN STACK Development
- WEB-APPLICATION Development
